

SPECIFICATION AMENDMENT(S)

Page 1, cancel lines 5-7, as initially presented, and substitute therefor:

--In my international patent application, PCT/AU98/1059, which matured into U.S. Patent 6,832,456, I have described a formwork system based on a combination of modules which facilitates the forming of solid concrete walls.--

Please insert the Abstract, appearing on a separate sheet, into the specification.
